

INAUGURAL SYMPOSIUM

NECB 2026

New England Computational Biology Symposium

October 1–2, 2026 · Microsoft Research New England, Cambridge, MA

About

A two-day, in-person symposium bringing the New England computational biology community together — keynotes, contributed talks, lightning talks, open-problem sessions, and posters. Our focus is **local networking**, **trainee visibility**, and seeding new collaborations at the frontier of computation and the life sciences.

Generative AI · Virtual Cells · Protein Design

Foundation models for biology, virtual cell simulation, and computational protein design.

Spatial & Single-Cell Omics

Methods, models, and applications at the single-cell and spatial transcriptomics frontier.

Agentic AI for Biology

Autonomous agents, reasoning systems, and agent–scientist collaboration for discovery.

Confirmed speakers

KEYNOTE SPEAKERS

Sergey Ovchinnikov — MIT

G.V. Shivashankar — ETH Zurich · Paul Scherrer Institute

Caroline Uhler — Broad Institute · MIT

Marc Vidal — Dana-Farber · Harvard Medical School

INVITED SPEAKERS

Alex Lu — Microsoft Research New England

Rong Ma — Harvard T.H. Chan School of Public Health

Sahin Naqvi — Boston Children's Hospital · HMS

Armita Nourmohammad — Yale University

Yuri Pritykin — Princeton University

Key dates

Abstract submission opens	Mon Jul 6, 2026
Abstract deadline	Fri Aug 14, 2026 · 23:59 ET
Author notifications	Fri Sep 4, 2026
Early-bird registration ends	Fri Sep 11, 2026 · 23:59 ET
Regular registration closes	Mon Sep 21, 2026 · 23:59 ET
Late registration closes	Fri Sep 25, 2026 · 23:59 ET
Conference	Oct 1–2, 2026
